State [Party]: SWEDEN reporting for time period from 01/01/2014 to 31/12/2014

International Co-operation and Assistance

During the period covered by this report (2014), Sweden contributed at least SEK 53 155 000 to mine action. Most of this was channelled through the Swedish International Development Cooperation Agency (Sida). For details, see the attached Table 1.

The Swedish Civil Contingencies Agency (MSB) is operational in the field of mine action in support of primarily UNMAS and the ICRC. MSB has an EOD rapid response capacity, as well as expertise in fields such as Mechanical Clearance, Quality Assurance (QA), Mine Detection Dogs (MDD) and IMSMA. In the reporting period, Mine Action activities have been carried out by the MSB, through UNMAS, in CAR. This action was financed already in 2013. Sweden has also supported EOD activities in Gaza through seconded expertise from MSB to ICRC. During the period covered by this report, MSB has conducted technical training and exercises within Mine Action.

In 1997, Sweden established SWEDEC. SWEDEC is the country's focal point on technical matters, development, education and training. Today SWEDEC is focused on education and training of individual officers and military units on Conventional Munitions Disposal (CMD) and Improvised Explosive Device Disposal (IEDD) as well as related research and development. Sweden is lead nation in the user group for EOD IS where SWEDEC offers an important contribution.

The definition of Mine Action used includes the following elements: i) Mine awareness (measures to make people aware of and to inform people of the risks of mines and unexploded ammunition) ii) Demining (survey, mapping, marking, clearance) iii) Victim assistance (support to victims of mines, including rehabilitation and reintegration), iv) Advocacy (efforts to exert an influence in respect of limitation on the use of landmines and the total prohibition of anti-personal mines), v) Stockpile destruction (destruction of mines in stock). If “Mine Action” is indicated it implies a contribution integrating all the elements in the definition stated. If specific elements in the definition are indicated it implies that x contribution focuses on the indicated elements.
