

Mine Victim Assistance

Status Report

Croatia

Background

- Croatia experienced four years of war from 1991 to 1995
- High level of unexploded ordnance and landmine contamination throughout the former war affected areas
- Currently around 1,700 square kilometres are treated as a mine suspected at which it is believed that 10% is actually mined

1,842 mine victims in Croatia, 414 fatalities

Mine Victims								
Year	Number Of Incidents	<>	NI	LI	UN	K	HI	Total
	58	6		11	3	25	51	96
1991	215	0		44	8	43	166	261
1992	191	0		53	12	37	142	244

Current situation that reflects the status of mine victim assistance in Croatia

- Emergency and continuing medical care
- Physical rehabilitation/Prosthetics
- Psychological and social support
- Economic reintegration
- Capacity building and sustainability
- Laws and public policies

Actions

- UN Mine Action Centre, initiated a project of mine victim data collection at the end of 1997 implemented by a Croatian NGO, the Centre for Disaster Management
- In May 1999 CROMAC initiated a Mine Victims Section (MVS) that performed a needs assessment among 287 civilian mine victims based on the data gathered by CROMAC
- In 2000 CROMAC, MVS and the Ministry of Health identified the need to provide psycho-social assistance to all mine victims
- In 2001 a Project for psycho-social support and rehabilitation of mine victims was began in existing hospital in Rovinj
- In 2001 MVS performed a needs assessment among children and young people up to 25 years of age
- Late 2001 a project was initiated to create permanent centre for rehabilitation of mine victims for whole region with the special emphasis on Children
- In 2002 CMVA in cooperation with the Centre for disaster management continues with the needs assessment amongst remaining 1,400 mine victims
- In 2002 rehabilitation and psycho-social support continues in the existing facility in Rovinj

Expected results

- A detailed report on the mine victims surveyed - tool for decision making on issues related to mine victim rehabilitation
- Updated mine victim data base - tool for future amendments and adaptation of mine awareness programs
- Improved quality of life for mine victims both short and long term

Impacts

- Increased level and quality of care for Croatian mine victims
- Advances in mine victims' quality of life
- Increased expectations of future economic opportunities
- Long-term management and cooperation between the Croatian health care system and the CMVA
- Informed decision-making concerning Croatian mine victims
- Representational advocacy on behalf of Croatian mine victims
- Strengthened positions of all stakeholders, in particular of CMVA
- More efficient management of State Budget and donor funds

Victim assistance successes

- Project of psycho-social support and rehabilitation in Rovinj 2001-2002
- Donor – Canadian Government
- Budget ~98,000 US\$ total
- Employment of mine victims in CROMAC's data base department 2001-2003
- Donor – Norwegian Government
- Budget ~ 30,000 US\$ per year

Mine victims employed in CROMAC Data Base Department

Challenges

- Mine victims needs assessment – incomplete data base
- Implementation problems – insufficient manpower, short project implementation period
- Insufficient funding to meet all of our needs

Future action strategy

- Continue strong fund raising activities
- Stronger involvement of medical expert teams in order to do regular follow ups on mine victims and their families
- Raising public awareness on the necessity of the reintegration of mine victims
- Generating future employment
