

Intervention by Sweden on Article 3
Standing Committee on the General Status and Operation of the Convention
16 May 2003

"The change in numbers of retained mines regards a number of mines retained by the private company Bofors Defence which should have been included in previous reports. We have now corrected this error and they are accounted for. All the mines in question are to be used by Bofors to develop Mine Clearance Equipment. The Swedish Government is in the process of discussing with Bofors on how the number of retained mines can be reduced. "
